SUMMARY

IT professional with 5+ years of experience bridging business requirements and technical solutions to deliver scalable web applications and enterprise systems. Combines strong front-end development expertise (React, Next.js, Angular) with system analysis, REST API integration, and cross-functional project coordination. Proven track record in translating complex business needs into functional, high-performing products within agile environments.

EXPERIENCE

PT Padepokan Tujuh Sembilan Apr 2025 – Oct 2026

Front-End Developer, Onsite at PT NTT Data Indonesia · Contract

- Responsible for the design, development, and maintenance of web applications, ensuring every feature aligns with the business's functional goals
- Leveraged AI-powered development tools (Claude CLI) to accelerate and optimize development efficiency
- Managed repositories, version control, branching, and code reviews
- Coordinated with cross-functional teams on business requirements and translated them into functional product features
- Led periodic product evaluations based on end-user feedback to improve user satisfaction and system workflow efficiency
